

FLEXIBLE TUBING & SLIP-LOK FITTINGS

Fogco tubing and Slip-lok fittings are designed for the ultimate in convenience and versatility. The ease of assembly allows for quick and simple installation reducing labor costs.

The Slip-lok fittings and flexible tubing can be used to create virtually any nozzle spacing allowing on-the-job customization that is unique to these components. No special tools or crimping procedures are required. In addition, the fittings can be removed, replaced, and re-installed to further enhance the systems overall design flexibility. Fogco high-pressure nylon tubing and Slip-lok fittings are designed for the ultimate in convenience and versatility. The ease of assembly allows for quick and simple installation reducing labor costs.

High pressure nylon is 3/8" O.D flexible Nylon 11 and has an operating pressure of 1000 PSI. This nylon uses high grade virgin compound resistant to solvents, alkalis, and oils. It is available in 24 inch and 30 inch straight lengths or 50, 100 and 500 foot coiled lengths. The Slip-lok fitting and nylon tubing are also used to build the Fogco Mistscaping risers.

High pressure hose is Synflex 1/4" ID rated at 1,500psi working pressure. Convenient field installable male and female 1/4" pressure fittings are available.
